PROFESSIONALSUMMARY

Full-Stack Developer with hands-on experience in both front-end and back-end technologies, gained through university projects. I excel in building scalable applications, bridging user needs with technical solutions, and delivering seamless user experiences. I am eager to apply my skills in a dynamic Full-Stack Developer role, contributing to innovative solutions and promoting continuous growth.

• ASP.NET	• C#
• Java Script	• MySQL
• ASP.NET Core web API	• Angular
• HTML & CSS	• React
• Bootstrap	• Git & Git Hub

EXPERIENCE

Intern – ASP.NET & Angular

Apply Dreams –Lahore   June 2025 – Present

Software development company focusing on **ASP.NET** and **C#** backend applications:
- Collaborated with senior developers to build and maintain web applications using RESTful APIs and worked on backend functionality following MVC architecture
- Integrated **MySQL** databases and optimized SQL queries for performance.
- Contributed to bug fixing, feature development, and testing of existing applications
- Worked with Git for version control and followed Agile development practices
- Participated in daily stand-ups and team code reviews to improve code quality
- Gained hands-on experience.

PROJECTS

E-Commerce website
An e-commerce platform for users to manage their portfolios:

- Developed a platform enabling users to browse products, add them to cart, and manage orders with customizable features using HTML, CSS, and **Angular**.
- Utilized HTML, CSS, and Angular for front-end development, with **ASP.NET** for back-end functionality and **MySQL** for database management
- Ensured the platform was fully responsive, providing an intuitive and seamless experience across devices

Personal portfolio
Personal portfolio website to showcase my web development skills:

- A personal portfolio showcasing my skills in web development, along with detailed descriptions of key projects and achievements
- Designed to offer seamless user experience, featuring an interactive layout with a focus on my technical expertise
- Built using **HTML**, **CSS**, and **React**, highlighting my projects, certifications, and personal growth.

Smart Quest Project
 Web application project implemented using modern development practices:

- Agile software development methodologies for efficient project management, ensuring iterative development and timely delivery of features that aligned with user requirements and client specification
- Designed and implemented database-driven web applications, leveraging **SQL** to manage and integrate complex data structures with backend systems
- Utilized Agile software development methodologies for efficient project management.

EDUCATION

Computer Science – bachelor's degree
University of Engineering and Technology, Lahore, Pakistan

Computer Science – Intermediate
Apex Group of colleges, Lahore, Pakistan
